

5 Reasons Why You'll Love FleetWave-LTE Push-To-Talk Radios

FleetWave-LTE provides the new go-to products for all of your business needs; our Push-to-Talk technology allows you to instantly communicate with your team at the press of a button, whether you need to reach an employee across town or even across the country, FleetWave-LTE has you covered! Here are just five reasons why you'll love our PTT products and how we can help your business.

1. Nationwide Coverage—and Canada!

Rather than relying on traditional statewide repeaters to communicate with your team, our PTT products work over Wi-Fi and 4G/LTE cellular to provide reliable, nationwide coverage. Communicating with your team across the country or down the hall instantly becomes so much more efficient! What's even better is that FleetWave-LTE also works in Canada—something that many other PTT companies do not provide. [See our coverage map here:](#)

2. Instant Communication

As stated earlier, our PTT products provide instant communication at the press of a button. What's even greater, is that our products allow for both group and private calling! With our great sound quality and long-distance reaching capabilities, FleetWave-LTE is perfect for any sized business

3. Useful for Any Industry

FleetWave-LTE can benefit just about any industry; construction, towing, transportation, fire and rescue, and many more—how we stand out from most other PTT companies is our focus on integrating Push-to-Talk technology to the public safety industry, which includes but is not limited to campus security, police officers, and security officers. Our interoperability allows for the connection between traditional and existing LMR systems and our PTT over cell products. See how each industry can be benefited through our PTT products: (link when we have new website)

4. Low Cost

Cellphones and traditional LMR systems can be very expensive, which is why we provide a more cost-effective solution for our Push-to-Talk products using month to month pricing plans. Another reason why you'll love FleetWave-LTE is that we also provide options for leasing equipment! [See our pricing plans here:](#)

5. Easy to Use Dispatch Console and App

Our dispatch console and app allows you to easily communicate, track, and monitor your team. We also provide a mobile app for Android or iPhones to instantly talk between cellphones and our PTT products over Wi-Fi and cellular data.

If any of these reasons can benefit your business, [contact us today](#) for more information on our services, products, and other advantages of our FleetWave-LTE technology!
